Full Stack Web Developer looking for a challenge and somewhere to put my skills to the test. Love to learn new languages and love to code.

TECHNICAL SKILLS
Languages: JavaScript, HTML, CSS, Node, MongoDB, MySQL
Frameworks: React, JQuery, Express, Bootstrap, Wordpress
Core Concepts: Git, Heroku, APIs

PROJECTS
this.Event | Github: https://github.com/derekstoeckmann/this.Event |Live Site: https://immense-dawn-90138.herokuapp.com/
- this.Event allows you to create, view, and update events that are happening in your community.
- I handled working with AWS for authentication. Worked with JWTs to authenticate users before they could hit our back end routes.
- React, MongoDB, MaterialUI, AWS, Express, Node, Google Maps API

YouCritic | Github: https://github.com/aaronangle/YouCritic | Live Site: https://calm-forest-73494.herokuapp.com/
- YouCritic allows you to view and search movies, learn about them, and provide your rating of the movie.
- Created the entire back end by myself. Worked on the routes as well as using Passport for authentication and security.
- JavaScript, Handlebars, MySQL, Bootstrap, JQuery, Express, Node

Employee Directory | Github: https://github.com/aaronangle/React-Employee-Search | Live Site: https://guarded-stream-10675.herokuapp.com/
- The site makes a call to an API and displays the user data. This site was built with all React Hooks
- I built this site by myself. I utilized the React Context API to manage passing state between components.
- React, API

EXPERIENCE
General Foreman 2018 – 2019
Elements Construction Thatcher, AZ
Led a small construction crew for miscellaneous construction projects. Learned how to be a team player as well as how to communicate with others. Learned to meet expectations and deadlines that were set by my supervisors.

EDUCATION
Certificate in Full Stack Web Development: University of Arizona, Chandler, AZ
Eastern Arizona College: August 2018 – April 2019
Codecademy HTML & CSS Certificates: https://www.codecademy.com/profiles/aaron_angle
